Dear Parent or Guardian:

The regulations for health examinations have changed effective July 1, 2018. State law requires that each child in a school district have a health examination, including body mass index, and also *recommends* a complete dental examination prior to entering school. Health examination will be required for grades PreK, Kindergarten, 1st, 3rd, 5th, 7th, 9th and 11th grade students. These appraisals may be done up to one year to the month before your child begins these grades, as an exam is valid for a full year through the last day of the month in which the exam was conducted. Additionally, new entrants to the district, students wishing to play interscholastic sports, and students desiring work permits must have an annual health appraisal. Your family physician/nurse practitioner is most familiar with the medical history of your child and is able to start treatment when necessary. Therefore, the district recommends that all examinations be made by your family physician/nurse practitioner. You or your provider may return the completed form to the health office. Completed health certificates can be directly mailed or faxed to the school nurse from the provider's office.
